

SONITRON® BRIEFS

FEBRUARY 2009

CHEMOX® HITS THE SPOT

Since its introduction to the market CHEMOX® has been enthusiastically received and we have confirmation from many field reports of its value in boosting results across a wide range of difficult soils.

We have been asked for further information on a number of points and we will answer common questions in this and subsequent issues of Sonitron® Briefs.

Q. Does the CHEMOX® system differ from the 2 pack oxidizing stain remover system using Browning Remover and Special Ammonia Solution?

A. Both systems rely on oxidation as the primary mechanism but the detail of how this is done differs in the following ways:-

2 PACK STAIN REMOVER SYSTEM

1. This uses the highest permissible concentrations of peroxide since the requirement is to remove the stain as soon as possible to save valuable time.
2. The Special Ammonia solution activates all the oxidizing power rapidly and then destroys it. The advantage of this is that bleaching cannot continue after the technician has left the job. This gives complete control of the results.

CHEMOX® SYSTEM

1. This is effective with lower concentrations of peroxide since the pre-spray is on the carpet for between 5 and 20 minutes (and is then extracted.) These lower concentrations give maximum economy when cleaning large areas.
2. The efficacy is increased if the peroxide is as stable as possible. This means that prepared pre-spray solutions remain fully effective during the whole of the dwell time of the pre-spray solution on the carpet.
3. The low concentrations used rely on the presence of the detergent blend to exert a combined effect. These low concentrations are generally regarded as safe on fibres and dyes. However we support the Australian Standards for Carpet and Upholstery cleaning and their recommendations for appropriate pre-testing.

We welcome David and Dianna Heath of Davanna Cleaning Supplies 45-47 Andover Street Carlton to our Sonitron® Family. David and Dianna are Master Distributors of Sonitron® Products for the Sydney area and will be servicing an area from Newcastle, to Wollongong, to the Blue Mountains. They will be carrying a full range of Sonitron® Chemicals and offer a delivery service to all areas. Davanna Cleaning Supplies — Phone: (02) 9588 7144, Fax: (02) 9588 3955, e-mail david@davanna.com.au
