SONITRON® BRIEFS

EFFECTIVE + **RELIABLE** + **PROVEN** = **GUARANTEED**
MACHINE + **CHEMICAL** + **METHOD** = **RESULT**

Sonitron® can offer you everything you need to carry out the above. This has been the Sonitron® equation since the day our business opened. If you follow this rule you will be able to offer your clients a first class clean.

Reliable Chemicals-We have over 50 different chemicals for professional carpet cleaners and an equal number in our general cleaning range. Our extraction carpet cleaning range includes time proven products such as Sonisteam, SK50 (Woolsafe approved) and GROG® together with products keeping up with the latest trends such as GUSTO®. For encapsulation we offer the Zenith (Woolsafe approved) range. We have all the usual general cleaning products plus time and money saving specialties such as glassSHIELD.

Effective Equipment-We offer Steamvac the leading Australian brand for professional carpet extraction cleaning, including high performing portables and truck mounts. Selected imported machines including the Truvox Cimex for encapsulation cleaning and the Cleantec and Kerrick ranges for self cleaning establishments such as hotels and nursing homes.

Methods- Like most cleaning suppliers we offer and believe in training. Sonitron® were one of the first in Australia to offer training in carpet cleaning. We have a Carpet Cleaning Course CD available to those who are unable to attend a school, and we work very closely with Col Nation of Woolsafe® and Daniels Associates.

All of this enables us to help our clients achieve our company equation of Effective Machine+Reliable Chemical+Proven Method =Guaranteed Result.We have been doing this for well over 30 years.

If you would like any further details on Sonitron® or the products we sell contact us at:-
