

# SONITRON® BRIEFS

MARCH 2009

## GOOD NEWS FOR YOU FROM THE GOVERNMENT STIMULUS PACKAGE

If you have been considering new equipment now is certainly the time to buy. Small business (turnover less than 2 million) is eligible for a 30% investment allowance for any purchase over \$1000. Larger businesses must spend a minimum of \$10,000. This is the highest ever offered. Some practical effects are illustrated below. Prices are stated as approximate values since people normally select various different hose lengths, wand types, brushes, pads, upholstery tools etc.

**STORMCHASER EXTRACTOR**

Approximate Cost

30% Saving

\$5000

\$1500

**CIMEX 48CM ENCAP MACHINE**

\$6000

\$1800

**PRESTO SPOTTING MACHINE**

\$1400

\$ 420

**STEAMVAC APOLLO HP2**

\$10000

\$3000

Contact our Tim Davis for full details on how the investment allowance works.

We can structure our normal incentives to give you the maximum advantage. In addition to the investment allowance, business can also claim normal depreciation deductions over the effective life of the equipment.

### CHEMICAL PACKAGING IMPROVEMENT

Our new chemical packs give maximum protection and convenience. We prefer white 5lt bottles to reflect heat and prevent UV penetration from sunlight. These now have a view strip on the side with graduations so you can observe how much liquid remains. The 5 litre bottles are already being filled and similar 20 litre packs will follow in the next few weeks.

## ADVANTAGES OF SONITRON® CARPET and UPHOLSTERY PRE-SPRAYS

If you prefer a built in perfume Sonisteam and Citrus Sonisteam are available. SK50 is compatible with the full range of Sonitron® deodorants so you can have no perfume or select something appropriate to the work.

Example:

Odorblok for rentals, Fresh Citrus or Mint to use near food service or preparation areas etc.

You can also regulate the quantity of perfume with the SK50 system. All Sonitron® pre-sprays are effective across the full range of permissible temperatures.

- ◆ Give credible performance even in cold water
- ◆ Show very effective performance at the highest practical pre-spray temperatures.

For accurate and trouble free performance using venturi type prespray guns such as Hydroforce this is normally considered to be 70° C (160° F)

All Sonitron® pre-sprays are compatible with Chemox for additional activation on difficult jobs. In the next Sonitron® Briefs we will deal with formulas and methods of mixing for SK50, various deodorants and Chemox as a combined pre-spray.

In addition to the above products our SK45 Hypo-Allergenic Pre-spray, Maxi-T-3, Maxi-T-3 Citrus Special, and Fibreclean Upholstery pre-spray are all compatible with Chemox.
