or your nearest  
Sonitron®  
distributor.

## ENCAPSULATION RANGE IS NOW COMPLETE

While ZENITH has been primarily used as a shampoo compound with machines such as the CIMEX, many customers have reported excellent results when it is used to scrub dirty traffic lanes prior to extraction. However, it is a high foaming product as are nearly all carpet shampoos and this can cause problems with some extraction systems.

Now that GUSTO® is available you have a complete range of options. GUSTO® is a very low foam product, and this avoids any foam problems.

Zenith Shampoo has  
International  
Woolsafe® Approval.

Zenith Plus contains  
fluorochemicals to  
protect the carpet.

GUSTO® is a pre-  
spray for extraction  
with encapsulating  
properties

Release with Encap is  
a bonnet cleaning  
product with Encap  
Properties.

Zenith Encap Spot &  
Stain Remover is  
ideal for on selling to  
your clients for day  
to day carpet  
maintenance
