

SONITRON

ABN 66 021 652 107

BULK SOLVENTS AVAILABLE FROM SONITRON®

To facilitate our research on new formulations we receive information from NICNAS on all new chemicals entering Australia. Recently we have noted that about half of these relate to new formulas for colour copying, photocopy toners, inks for colour cartridges and other supplies for increasingly complex office machines. Some of these will be spilled onto carpets and cleaners will receive requests to clean off substances that are totally unknown from any previous experience.

In addition to our various grades of GROG® and S110, we also stock Graffiti 5, primarily sold as graffiti remover but it does not contain any substance known to be damaging to carpet fibres, (pre-test still necessary!) We have a limited stock of Perchlorethylene and Amyl Acetate, which we are offering this month at bargain prices.

PERCHLORETHYLENE

This is the solvent used by most dry cleaners in Australia. It is very heavy so we sell it by the kg to avoid filling any container in excess of its rating

5kg	\$15.00 plus GST
20kg	\$55.00 plus GST

AMYL ACETATE

Also known as 'banana oil'. This is the solvent used in traditional nail polish formulas

500ml bottle	\$7.50 plus GST
5lt bottle	\$49.50 plus GST

For these products most of the stock is retained in bulk so we can pack exactly what you require. So please phone in your order if you wish to pick up at the factory.
