SONITRON® BRIEFS

MAY 2009

We keeping on hearing Mr. K Rudd telling us how tough things are, and he paints a very grey world. His friend Mr. Obama wears a different pair of glasses and he sees hope in the World. We in the cleaning industry like Mr. Obama are very positive people. We know that cleaning is a very good industry to be in when times are tough. It wears a recession proof badge. Now is a good time to look at ways of extending your services to make your business even more secure.

Here are some ways of extending your services with little expenditure.

If you are carrying **SK50** for carpet work you will find it is very effective and safe for use with the tile cleaning accessory head. If the grout is very bad it may need an acid cleaner and we offer **SERACLEAN** a safe acid cleaner. While in the bathroom area cleaning tiles you can increase your range of services with **TWINK GLASS CLEANER**, and **glassSHIELD**.

SK50, TWINK, SERACLEAN, and glassSHIELD are available in 5lt, 20lt., and 200lt pack sizes. **glassSHIELD** is also available in a 500ml pack.

SERACLEAN grout and tile cleaner, Twink Glass Cleaner and glassSHIELD give you another range of products to use for Bathroom Cleans.

Increase your income to-day.

Why not offer hard surface floor cleaning. Our well known Dazla products will give an excellent finish to hard surfaces?

Supastrip for stripping the floor if necessary

If your customer has stainless steel appliances and you want to really impress your answer is PROTECTOR OIL It cleans stainless steel and leaves a protective film. It is available in 500ml

5lt
20lt
200lt

As well as the chemicals we can supply all of the equipment items you may need including mops, buckets, Squeegees, microfibre cloths, scrubbing and burnishing machines etc.

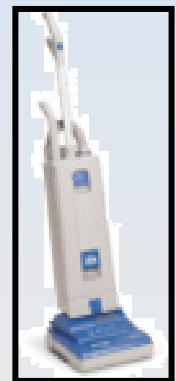

INCREASE YOUR INCOME TO-DAY and make your customers very happy at the same time.
