

SONITRON® OCTOBER BRIEFS

ECONOMIC DOWNTURNS ARE USUALLY GOOD FOR THE CLEANING INDUSTRY.
PEOPLE CLEAN INSTEAD OF REPLACING.
ARE YOU READY TO FACE AN INCREASE IN BUSINESS??

IS YOUR EQUIPMENT IN GOOD CONDITION AND READY TO GO?

IF YOU ARE LOOKING AT REPLACING YOUR EQUIPMENT BEAR IN MIND THAT THE FOCUS OF THE WHOLE COMMUNITY IS GREEN THIS INCLUDES GREEN CLEANING.

TO OFFER GREEN CLEANING YOU WILL NEED TO CONSIDER THE FOLLOWING:-
A MACHINE AND METHODS WHICH WILL MEET THE CRITERIA REQUIRED TO GREEN CLEAN

HOW MANY CARBON EMISSIONS WILL YOUR EQUIPMENT BE RESPONSIBLE FOR EMITTING?

HOW MUCH WATER WILL YOU NEED TO DO YOUR WORK?

DO YOUR CHEMICALS MEET WITH GREEN CLEANING REQUIREMENTS?

**WE INTRODUCE YOU TO THE IDEAL GREEN CLEANING DUO
ENERGY EFFICIENT, DOES NOT USE MUCH WATER AND DOES A
FIRST CLASS JOB**

THE HIGH PRESSURE PORTABLE

Have you ever dreamed of one portable that can do it all! If so Steamvac now has the answer to your dreams with the new HP HIGH PRESSURE PORTABLE. This machine can be applied from low pressure upholstery to regular carpet cleaning, right up to high pressure tile & grout & concrete.

HP AVAILABLE NOW IN EVERY MODEL OF STEAMVAC PORTABLE FROM MANUAL TO AUTO MACHINES

ONE PORTABLE CAN DO IT ALL!

BUY AN ELECTRIC TRUCKMOUNT EXTRACTION MACHINE OR CIMEX THIS MONTH and receive the opportunity to Holiday at Rainbow Shores or Chemicals of your choice

G.R.O.G.[®] THE ULTIMATE OIL AND GREASE REMOVER

The name GROG[®] is an acronym for “Get Rid Of Grease” but G.R.O.G.[®] is useful for removal of many soils in addition to grease and oil. Some paints and inks, lacquers, nail polish, crayon, grass stains, chewing gum, blue tack, waxes, tar, some adhesives, cosmetics and shoe and furniture polish may also be removed. Modern technology moves rapidly and the formulations used to prepare adhesives, paints, inks, cosmetics such as lipstick and nail polish are changing on almost a daily basis. Since the formulas are so variable, it is only possible to indicate the general range of soils which it may remove.

Although specially formulated for carpet stain removal, G.R.O.G.[®] is also useful in the laundry and on fabrics generally such as drapes and upholstery. It may also be used for removal of graffiti from hard surfaces, but should be used with caution and after careful pre-testing on painted surfaces.

G.R.O.G.[®] is available in 3 formulations:

YELLOW G.R.O.G.[®]:

G.R.O.G.[®] is a clear slightly yellowish liquid with a characteristic solvent odour. It is a blend containing a range of solvents and emulsifiers which ensures it is effective on a wide range of solvent soluble and emulsifiable stains. G.R.O.G.[®] mixes with both solvents and water. When poured into water it disperses forming a white emulsion. The pH of this emulsion is almost neutral.

GREEN G.R.O.G.[®]:

This product is one of the G.R.O.G.[®] family of Sonitron[®] chemicals and is based on naturally occurring terpene solvents. The fruit juice industry in Australia, and all around the world, has as a by product the skins of citrus fruits left over after the juice has been extracted. The oil in these skins can now be extracted to provide solvents useful for many different industries. This avoids waste and the source, unlike petroleum, is continuously renewable. GREEN LABEL G.R.O.G.[®] is a clear liquid, which mixes with water to form a white emulsion or with most solvents to form a clear solution. It can therefore be removed from surfaces with either water or solvent.

G.R.O.G.[®] GEL:

It is well known that a principal problem with solvent cleaners for carpets and upholstery is penetration into the backing with subsequent possible damage to latex in carpets or polymer backing in some styles of upholstery cloth. This is prevented with the gel formulation. When applied to carpet it remains on the surface and can be worked on to any required extent without penetrating to the backing. The fact that the solvent is locked into a gel reduces evaporation, reduces odours and results in less volatile organic compounds in the atmosphere. The gel is slower to act than the standard G.R.O.G.[®], but it can be left for a much longer time without evaporation.

BARGAIN BUY

PERC (PERCHLORETHYLENE)

5KG \$15.00 20KG \$50.00 plus gst.

If you are in circumstances where you must have a non flammable solvent, Perc can actually put fires out. It is however, toxic, so make sure to wear your protective gear.

Only 200 kgs available at this price, so get in early.
