

# All New

# RD 7000

- The all new RD700 is the greatest SteamVac machine yet, capable of light tile and grout cleaning, its designed to keep up with your needs.
- More working pressure than most truckmounts on the market, with standard booster port for even greater power.
- Comfortable to use machine that easy to manoeuver with non-marking casters plus 2 non-marking pneumatic rear wheels
- Twin multi-stage vac motors with exclusive ultraflow air manifold for drier carpets
- Hour run meter, essential for accurate servicing.
- Body of heavy-duty marine grade fibre glass, 12 year guarantee.
- Optional Gulpa waste management system (see accessories brochure)
- Automatic water fill reducing operator fatigue.
- Built - in mufflers for both air inlets and exhausts.
- Exclusive cool air intake for vac motors, extending vac motor life.
- Pressure regulating valve, clear dome top, rear kick plate, quick release dump valve with heavy-duty alloy handle, stainless steel handles, quality brass and stainless steel fittings, electrical socket with separate electrical lead, bumper strips, HD lightweight aluminum frame.
- Tamper-proof positive ball valve shut off
- 3/4 hp totally enclosed fan cooled pump motor with external overload switch
- Running from a two inch system creating 30% more air flow, giving you longer hours on vac motors.
- 100% Australian designed and manufactured with quality and integrity for use on a global level.

## Specifications

Vacuum Options: 2 x 1200, 2 Stage

Waste: 40 Litres

Weight: 50 kg

Width: 570mm

Pressure: 2000psi twin piston hawk pump driven by 0.75kw induction motor

Wheels: 2 x Swivel Casters 2 x Pneumatic

Solution: 40 Litres

Length: 680mm

Height: 1000mm
