

Sonitron would like to wish all of our valued customers a very  
**HAPPY NEW FINANCIAL YEAR!**

## This Month's News from Sonitron®

Our new look briefs for July is focusing on Zenith Encapsulating Shampoo, GROG (Get Rid of Grease) and the fact that we have increased our range of hot water soil extraction machines to include the well established and highly regarded Steamvac range. We are hoping to see you in our newly revamped showroom in the coming year.

### GROG® GEL

#### PRODUCT DESCRIPTION

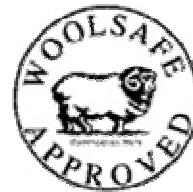

This product is now available in the form of a thick white liquid as an alternative form of this popular product. The primary reason for this alternative is to increase the safety and efficiency in particular circumstances. The standard pack is a clear 500ml bottle fitted with a childproof cap. A spare "witches hat" type dispenser cap is included.

**Breakthrough news!!** GROG GEL now available in 5 litre & 20 litre packs due to popular demand. Contact us now on 07 3266 9966 or email [sales@sonitron.com.au](mailto:sales@sonitron.com.au)

#### APPLICATIONS

When large quantities of chewing gum or blue TAC are to be removed from carpet or hard surface floors, particularly when there is concern about damage to the backing of carpet, the gel is very convenient. A blob of gel can be rapidly applied to each piece of gum, and the white colour of the gel identifies treated areas. The gel is slower to act than the standard GROG®, but it can be left for a much longer time without evaporation. For more information regarding the different applications & uses for GROG GEL, please contact us on 07 3266 9966 or email [sales@sonitron.com.au](mailto:sales@sonitron.com.au)

## ZENITH ENCAPSULATING CARPET SHAMPOO

It is a low pH compound which is safe on all commonly used fibres including wool and 5<sup>th</sup> generation stain block nylon. It has exceptional cleaning power on all fibres and removes a large percentage of stains during the clean. When used at a dilution of 1 part in 8 of water for pre-spotting it can remove biro and other inks and many coffee stains.

It is very economical to use, owing to low labour costs and low chemical costs per square meter. The most commonly used machine the CR48 Cimex Cyclone can cover up to 300 m<sup>2</sup> per hour using Zenith. Larger machines when they can be deployed are even faster, since ZENITH gives an instant clean at productive machine speeds. The chemical cost can be as low as 4 cents per m<sup>2</sup>. For more information regarding ZENITH, please contact us on 07 3266 9966 or email [sales@sonitron.com.au](mailto:sales@sonitron.com.au)

## TECHICAL TIP

Recent work has shown it is very easy for cleaners using ZENITH for encapsulation to get a great result on ceramic tiles with the powerful cleaning action of ZENITH.

- ✚ No need to change your solution – simply move straight off the carpet with your Cimex or Orbis and scrub the tiles.
- ✚ The smaller machines you use on stairs etc can do corners and edges
- ✚ Only one chemical to stock – and it is totally safe if splashed on to carpet and or other types of flooring.

## **STEAMVAC**

We have recently been selling imported extraction machines such as the Ninja and Stormchaser. These machines offer great value for money and are reliable. In response to customer demand we are now also distributing the high performance Australian made Steamvac range.

Steamvac offers a big range of models for every budget and purpose, including a 1600psa model which can do a good job on tile cleaning, as well as carpets. Innovative accessories such as the GULPA and SIZZLER together with quality wands and the vapour tech upholstery tool, make STEAMVAC one of the most comprehensive ranges of extractors available anywhere in the world.

## Thought of the month

The things that will destroy us are: politics without principle; pleasure without conscience; wealth without work; knowledge without character; business without morality; science without humanity; and worship without sacrifice.

- Mahatma Gandhi

## **\*\*\*\*\*IMPORTANT NEWS FLASH\*\*\*\*\***

### ***Worried or wondering about how the drought and/or water level restrictions will affect your business & industry?***

Important information has come to light concerning how water usage guidelines are to be put into effect across a range of industries – including the Carpet Cleaning Industry.
